

Interdependency

Picture Vocabulary

Biology

Predator

An organism that captures and consumes another organism for nourishment.

Prey

An organism that is captured and consumed by another organism for nourishment.

Parasitism

The symbiotic relationship in which one organism benefits while the other is harmed.

Parasite

An organism that lives in or on another organism (host) and causes harm to the host.

Host

An organism within or upon which another organism (parasite, commensal, or mutualist) resides.

Niche

The ecological role played by an organism.

Habitat

The area and conditions in which an organism lives.

Interspecific

Activity occurring between two or more species.

Intraspecific

Activity occurring within a species.

Pollinator

Something that carries pollen from the anther to the stigma in flowering plants.
